Re: Determination of Administrative Completeness for Refuse Pile Redesign and PMLU Change, Plateau Mining Corporation, Willow Creek Mine, C/007/0038, Task ID #1788, Outgoing File

Dear Mr. Pappas:

After our phone conversation of January 26, 2004, the Division has looked again at the information you submitted on December 18, 2003 and has made a new determination of administrative completeness. We apologize for the confusion in the January 15, 2004 determination and trust that this letter and attached worksheet will clarify the issue. In those sections of the worksheet that stated, "not applicable to this review" it is understood that these areas have already been addressed under previous permitting actions and since this particular action hasn't changed that determination these sections are considered complete by default. We have changed the worksheet to reflect this. What this ultimately means is that your application is considered to be administratively complete.

A technical review of your plan will now be initiated. We anticipate that additional information will be necessary to make your application technically complete and look forward to working with you throughout the permitting process. Also, you should publish a Notice of Complete Application as outlined by R645-300-120 and provide the Division with proof of publication as soon as possible.

Thank you for your help in the permitting process. Please call me at (801) 538-5325 if you have any questions.

Sincerely,

Daron R. Haddock
Permit Supervisor

**ADMINISTRATIVE COMPLETENESS REVIEW WORKSHEET
(R645-100)**

DATE: December 30, 2003

REVIEWER(S): Dana Dean, Pete Hess, Priscilla Burton, Wayne Western, Jerriann Ernstsen

APPLICANT: Plateau Mining Corporation

MINE NAME: Willow Creek Mine **FILE NO.:** C/007/0038, Task ID #1788

"Administratively Complete Application" means an application for permit approval or approval for coal exploration, where required, which the Division determines to contain information addressing each application requirement of the State Program and to contain all information necessary to initiate processing and public review.

Directions: The categories listed below correspond to the minimum requirements for information necessary to initiate processing and public review. If a category is checked the Applicant has met the Completeness requirement for that category. If a category is not checked, the Completeness requirements have not been met. The comments column will identify the deficiency and what is necessary to correct it.
